COUNTRY USSR SUBJECT Research and	Manufacture of Gunlaying Radar Sets	DATE DISTR. // Feb 1952 NO. OF PAGES 2 NO. OF ENCLS. 1 USIED BELOW: (7) SUPPLEMENT TO REPORT NO.	truck nor the trailer had may installations or equipment on their noofs when they left the plant. Men they drove to the field, a callapathle antenna assembly was taken out of the truck and erected on the ground. This antenna had a height of approximately 30-50 meters. On its roof the trailer put up a piece of equipmer's consisting of four revolving screens in the form of a cross (in a horizontal projection). With this place of equipment set up the trailer looked similar to a FORZO-3 set.
	25X1X	NEVALUATED INFORMATION	25X1A Inote: The fact that the pun-laying redar part, may source above had an antenna assembly as a component part, may sorve as an indication that in 1949 the Soviets were already conducting research work on some new gun-laying radar sets stailar to US AAFFS-7-33, designed to control AAA fire against low-flying, high-speed jet adscraft.
